

SGOV 6-Month Risk-Free Proxy: Submission Report

Author: Kunal Singh
Generated on: 2026-02-12

Project objective:
Compute a 6-month risk-free return proxy from SGOV daily prices.

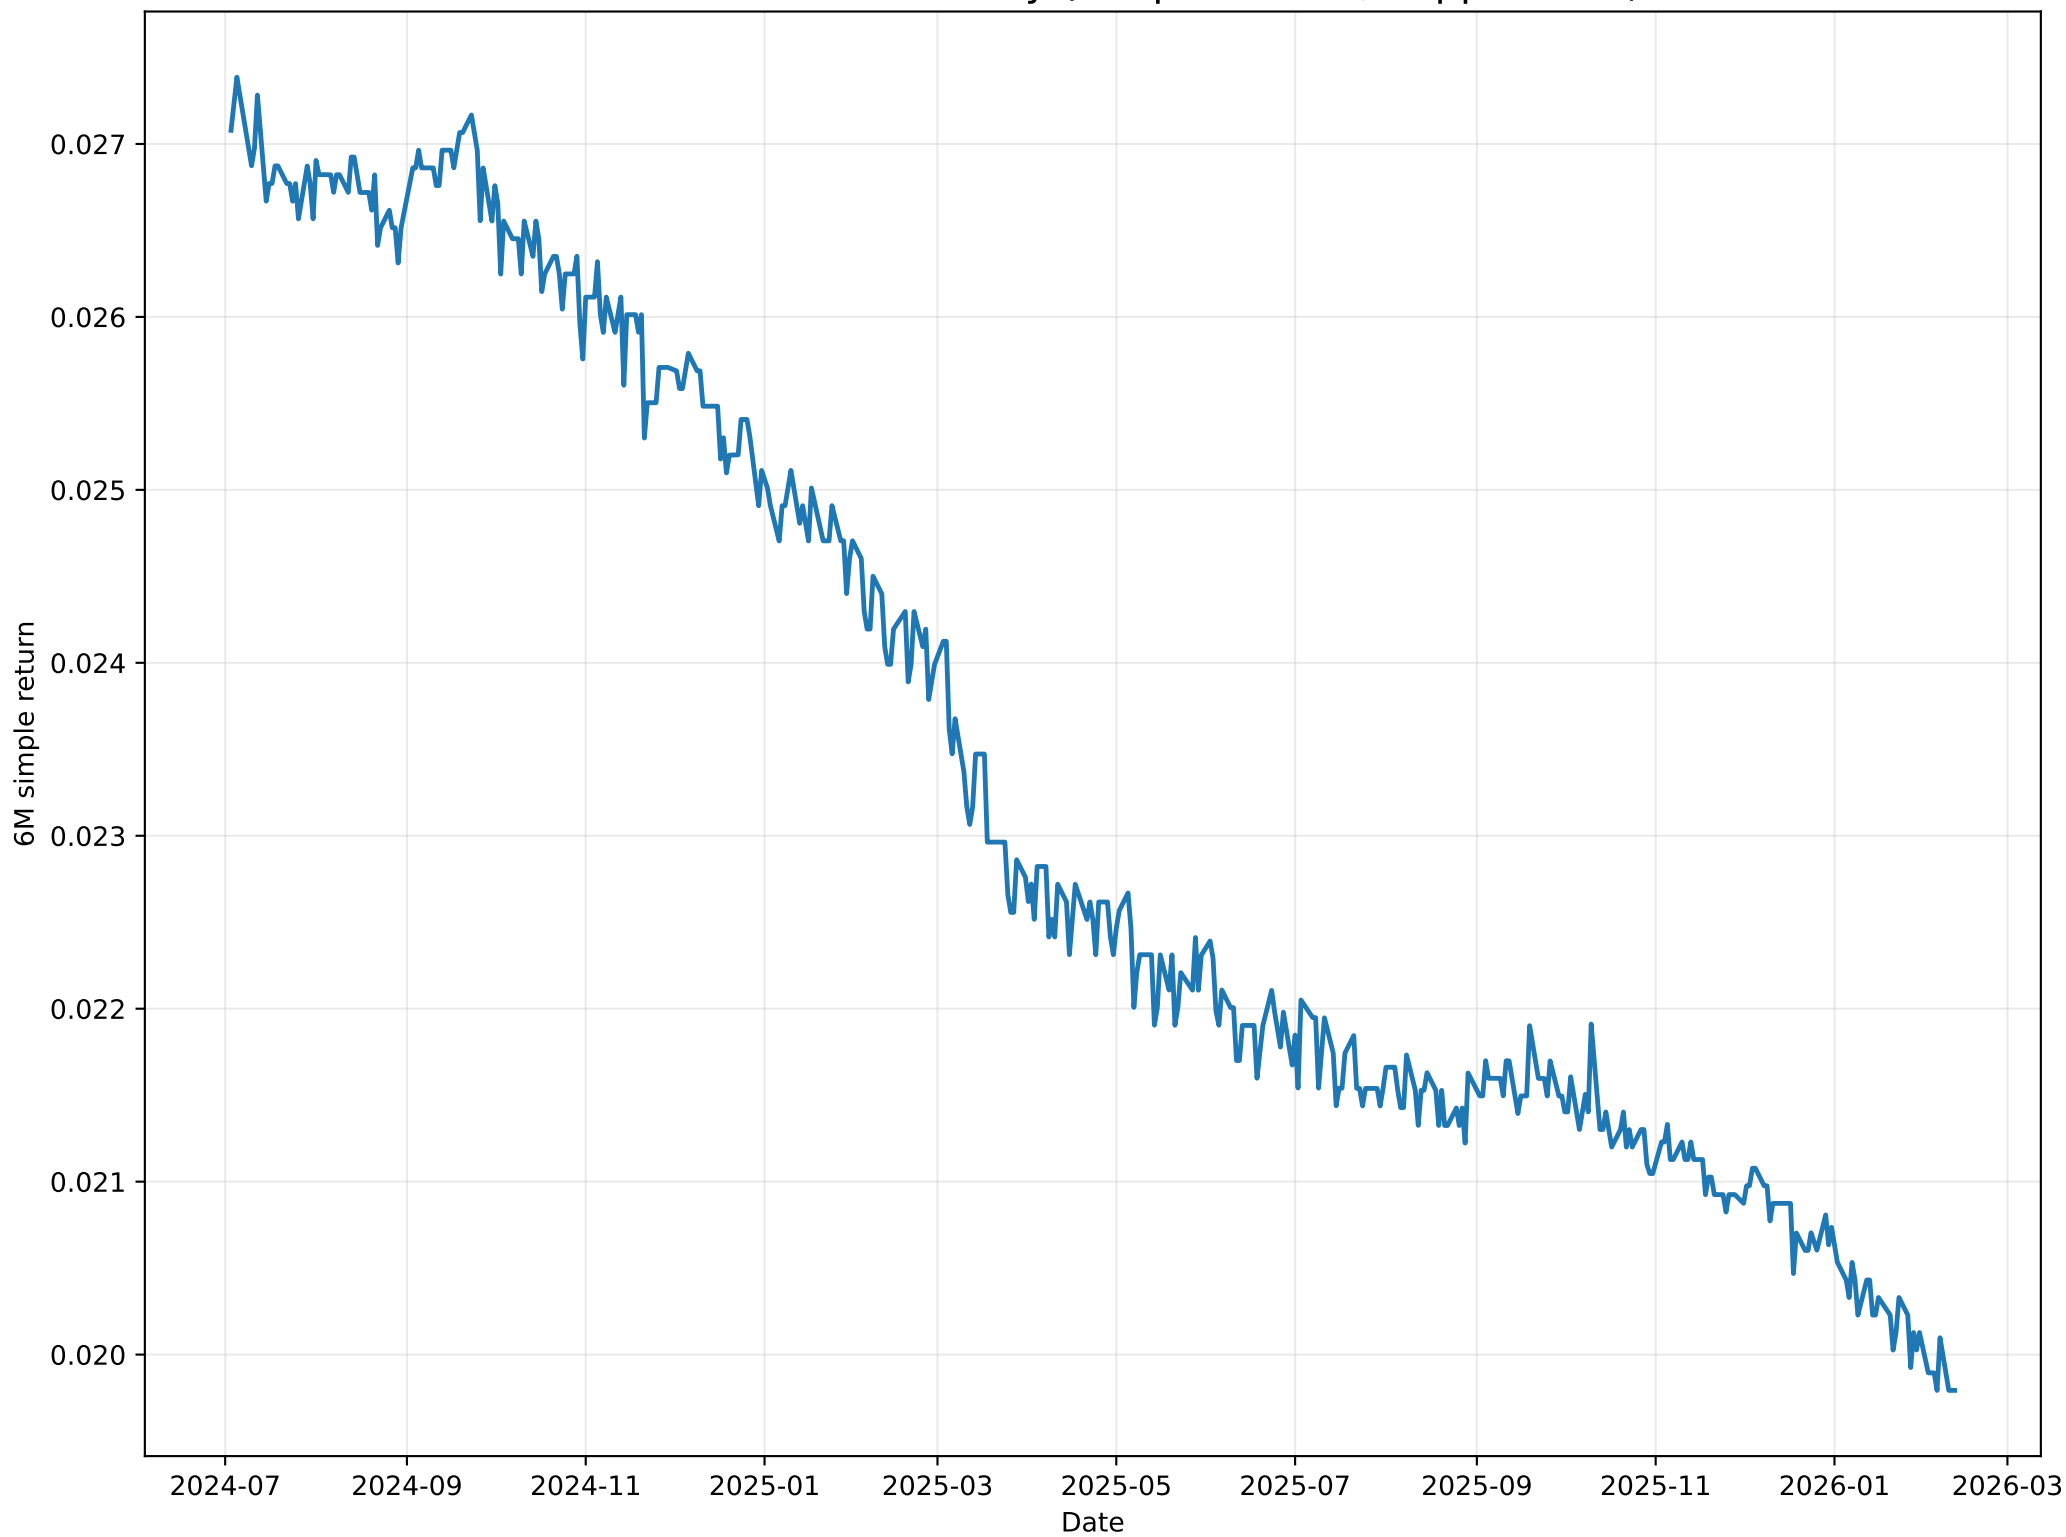

Methodology (stage by stage):

- 1) Stage 1 - Download SGOV daily price data from Yahoo Finance.
- 2) Stage 2 - Compute daily log returns and sum over a rolling 126-day window.
- 3) Stage 3 - Convert to simple return and clip negatives at 0 for the final proxy.
- 4) Stage 4 - Export CSV/XLSX/TXT and print terminal summary.
